

**12:00 p.m. - Workshop Room 2**

## **BRAIN INJURY TO THE ELDERLY**

Traumatic brain injury (TBI) is a significant problem in older adults. In persons aged 65 and older, TBI is responsible for more than 80,000 emergency department visits yearly; three-quarters of these visits result in hospitalization due to injury. Dr. Gattozzi will discuss how to avoid these types of injuries and the outcomes and future implications should you experience a brain injury.

**Speaker: Dr. Domenico Gattozzi**  
**Neurosurgeon**

### Ages Seen

- Adults
- Geriatrics

Gender: Male

Languages: English and Italian

#### Areas of Interest

Complex Cranial Neurosurgery, Skull Base Neurosurgery, Endoscopic Endonasal Skull Base Surgery, Minimally Invasive Surgery

#### Education & Experience

Year began practicing: 2014

Year began practicing in specialty: 2022

Medical School

2014

University of Texas Southwestern, Dallas, TX

Residency

2014-2021

University of Kansas Medical Center, Kansas City, KS, Neurosurgical Residency

Fellowship

2021-2022

University of Colorado, Aurora, CO, Endoscopic/Skull Base Fellowship

#### Professional Memberships

- Congress of Neurosurgeons

#### Honors, Awards, etc.

2018: University of Kansas Department of Neurosurgery Academic Award

2013: Alpha Omega Alpha Honor Medical Society

2008: Phi Kappa Phi Honor Society
